Year 9 Assessment Policy 2023

A guide for students and their parents

What is an assessment task and why is it so important?

Assessment is the opportunity to show what you know and what you can do. Your assessment tasks will help to diagnose your strengths and weaknesses so that teachers can focus their teaching on what you need to learn to be successful at school. You will also find out about areas to concentrate on to improve.

There are assessment tasks in each subject.

The tasks that you will complete could be:

- formal examinations
- tests
- assignments
- essays
- creative works
- field studies
- excursion reports
- in class assessment tasks

All formal assessment tasks contribute towards your achievement and grades and must be completed. The results of this work will be shown in your Half Yearly and Yearly Reports.

All students will be given an assessment schedule for each subject. It will tell you when each assessment task will be held, what you will be assessed on, and what the task is worth. This schedule should be referred to throughout the year.

You may also obtain clarification regarding your assessments from your teacher or the Head Teacher of the subject, provided you allow adequate time for a response.

Please remember that your teachers have many responsibilities and demands on their time and that the opportunity to obtain advice is limited (they cannot be available 24/7).

You are also required to complete class work and homework.

Student's Rights and Responsibilities:

Rights

Students have the right to –

Be given information about each task such as

- dates for each task;
- topic area and/or nature of assessment task;
- an approximate length or time for each task;
- mark value in relation to the total number of marks for the course; and
- how marks will be earned

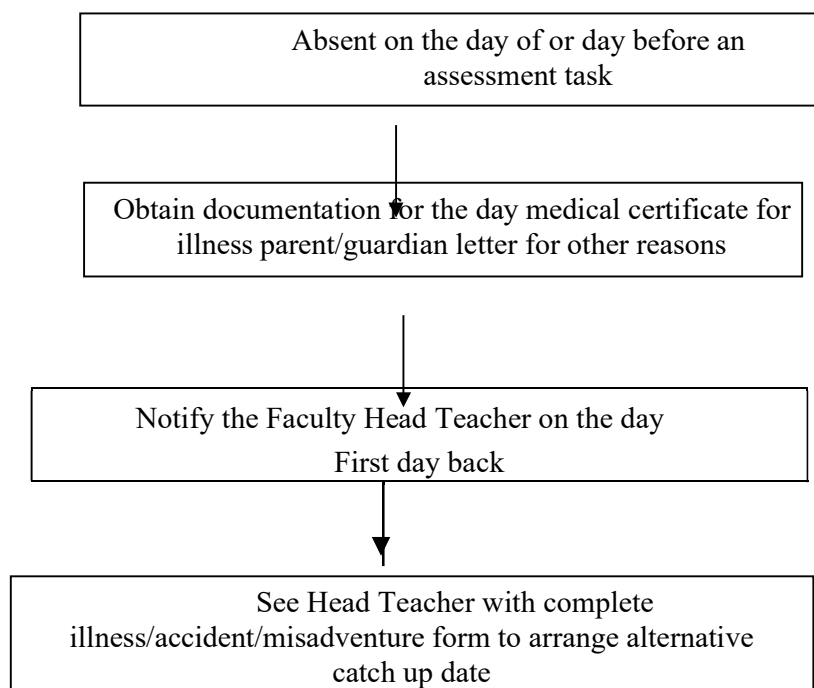

Be given Notification at least two weeks prior to formal Task

Be given meaningful feedback on their performance, ie why they received the Assessment Mark they did and how they may improve their performance.

Responsibilities

- Carefully read the assessment notification issued on the school's pro forma
- Plan and mark the due dates for the tasks in your homework diary and on a calendar at home
- You cannot be away ON the day or the day BEFORE any assessment task.
- In the event of unforeseeable circumstances, a misadventure form must be filled out.
It is the responsibility of the student to see the Subject Head Teacher to organise an alternative catch up task/date on the FIRST DAY back to school.
- Check that any technology or equipment needed to complete the task is working before the due date (computer access and printing issues are not an acceptable misadventure)
- Keep your drafts of assignments as evidence of your work
- Keep a record of your submission of the task
- Keep a record of your results

Misadventure Illness Appeal

As the assessment marks are intended to be a measure of a student's performance, applications must relate to illness or misadventure suffered immediately before or during the assessment that has affected the student's performance. Applications may be in respect of:

- a. illness or injury – that is, illness or physical injuries suffered directly by the student which allegedly affected the student's performance in the examination(s) (eg influenza, an asthma attack, a cut hand);
- b. misadventure – that is, any other event beyond the student's control which allegedly affected the student's performance in the examination(s) (eg death of a friend or family member, involvement in a traffic accident, isolation caused by a flood).

If you do not complete the task on the due date an illness/accident/misadventure form must be completed with relevant documentations and submitted to the Subject Head Teacher within 5 working days. An Illness/accident/misadventure form can be found on the school website and at the end of this document.

Unacceptable grounds for appeal

The application process does not cover:

- attendance at a sporting or cultural event, or family holiday unless prior approval has been obtained from the Principal
- Technology failure such as computer or printer malfunction cannot be taken as an acceptable reason for failure to submit an assessment task on time. It is the student's responsibility to save his/her work frequently and also to back up their work.
- matters avoidable by the student (eg misreading of timetable; misinterpretation of examination paper).

Late Submission Policy

- Submit a Misadventure Form with a Medical Certificate or Letter from Parent/Guardian explaining the reason for lateness. This documentation must be handed to the class teacher the day the student returns to school after his/her absence/s and within 5 days of the task (Note that weekends count as days). DO NOT wait until the next time you have a lesson.
- Penalty and letter home will be awarded/sent for students who fail to submit the task without appropriate and timely documentation.

Days Late	1-5	6 +
Penalty Rate	10% per day	Zero Mark

Frequently Asked Questions

What if you know in advance that you will be absent?

If you know that you will be absent with sufficient reason

- e.g. a funeral or an approved school activity, urgent medical attention-you will need to explain the circumstances in writing, before the absence, to your class teacher and/or faculty Head Teacher and a new due date will be given.
- e.g. overseas trip, extended leave-you will need to obtain approval from the Principal and organise an alternate arrangement with the faculty Head Teacher

What if you have been absent from school?

When you have missed a lesson, it is your responsibility to check with your class teacher or peers to see if any relevant information about an assessment task has been provided and arrange to catch up the work.

What happens when you hand in an assessment task?

Your class teacher will keep records of the assessment task handed in and issue you with a receipt. In a formal examination, you will complete an examination attendance slip for each subject or your attendance will be noted on the class roll.

What is malpractice?

Malpractice is any activity undertaken by a student that allows them to gain an unfair advantage over others

Malpractice includes, but is not limited to:

- Copying someone else's work in part or in whole, and presenting it as your own
- Using words, ideas, designs or the workmanship of others in practical and performance tasks without appropriate acknowledgement
- Using material directly from books, journals, CDs or the internet or any other source without reference to the source
- Building on the ideas of another person without referring to the source
- Buying, stealing or borrowing another's work and presenting it as your own
- Damaging another student's work
- Paying or having someone else complete the task for you
- Submitting work which another person such as a parent, tutor, subject expert or a sibling has contributed substantially
- Breaking published school examination rules
- Using non approved aids during an assessment task
- Providing false explanations for work not handed in by the due date
- Assisting another student to engage in malpractice

What if you copy other people's work?

A penalty will be imposed for copying, plagiarism or having someone else do the work for you.

What if you do not make a serious attempt or cheat?

A penalty may be imposed if you do not make a serious attempt in an assessment task, produce irrelevant or offensive material, or cheat.

Please Note:

Parents will be informed of any instances of malpractice. Students have the right to appeal if they consider that the penalty imposed is not justified.

Communicating	MA5.2-1WM	selects appropriate notations and conventions to communicate mathematical ideas and solutions
Problem Solving	MA5.2-2WM	interprets mathematical or real-life situations, systematically applying appropriate strategies to solve problems
Reasoning	MA5.2-3WM	constructs arguments to prove and justify results
Computation with Integers	MA4-4NA	compares, orders and calculates with integers, applying a range of strategies to aid computation
Fractions, Decimals and Percentages	MA4-5NA	operates with fractions, decimals and percentages
Financial Mathematics	MA5.1-4NA	solves financial problems involving earning, spending and investing money
Ratios and Rates	MA4-7NA	operates with ratios and rates, and explores their graphical representation
	MA5.2-5NA	recognises direct and indirect proportion, and solves problems involving
Equations	MA5.2-8NA	solves linear and simple quadratic equations, linear inequalities and linear simultaneous equations, using analytical and graphical techniques
Linear Relationships	MA5.1-6NA	determines the midpoint, gradient and length of an interval, and graphs linear relationships
	MA5.2-9NA	uses the gradient-intercept form to interpret and graph linear relationships
Area and Surface Area	MA5.1-8MG	calculates the areas of composite shapes, and the surface areas of rectangular and triangular prisms
	MA5.2-11MG	calculates the surface areas of right prisms, cylinders and related composite solids
Volume	MA5.2-12MG	applies formulas to calculate the volumes of composite solids composed of right prisms and cylinders
Numbers of Any Magnitude	MA5.1-9MG	interprets very small and very large units of measurement, uses scientific notation, and rounds to significant figures
Right-Angled Triangles (Trigonometry)	MA5.1-10MG	applies trigonometry, given diagrams, to solve problems, including problems involving angles of elevation and depression
Properties of Geometrical Figures	MA5.1-11MG	describes and applies the properties of similar figures and scale drawings
	MA5.2-14MG	calculates the angle sum of any polygon and uses minimum conditions to prove triangles are congruent or similar
Single Variable Data Analysis	MA5.1-12SP	uses statistical displays to compare sets of data, and evaluates statistical claims made in the media
	MA5.2-15SP	uses quartiles and box plots to compare sets of data, and evaluates sources of data
Probability	MA5.1-13SP	calculates relative frequencies to estimate probabilities of simple and compound events
	MA5.2-17SP	describes and calculates probabilities in multi-step chance experiments

Communicating	MA5.3-1WM	uses and interprets formal definitions and generalisations when explaining solutions and/or conjectures
Problem Solving	MA5.3-2WM	generalises mathematical ideas and techniques to analyse and solve problems efficiently
Reasoning	MA5.3-3WM	uses deductive reasoning in presenting arguments and formal proofs
Financial Mathematics	MA5.1-4NA	solves financial problems involving earning, spending and investing money
Financial Mathematics	MA5.2-4NA	solves financial problems involving compound interest
Ratios and Rates	MA5.2-5NA	recognises direct and indirect proportion, and solves problems involving
Ratios and Rates	MA5.3-4NA	draws, interprets and analyses graphs of physical phenomena
Algebraic Techniques	MA5.2-6NA	simplifies algebraic fractions, and expands and factorises quadratic expressions
Algebraic Techniques	MA5.3-5NA	selects and applies appropriate algebraic techniques to operate with algebraic expressions
Indices	MA5.1-5NA	operates with algebraic expressions involving positive-integer and zero indices, and establishes the meaning of negative indices for numerical bases
Indices	MA5.2-7NA	applies index laws to operate with algebraic expressions involving integer indices
Surds and Indices	MA5.3-6NA	performs operations with surds and indices
Equations	MA5.2-8NA	solves linear and simple quadratic equations, linear inequalities and linear simultaneous equations, using analytical and graphical techniques
Equations	MA5.3-7NA	solves complex linear, quadratic, simple cubic and simultaneous equations, and rearranges literal equations
Linear Relationships	MA5.3-8NA	uses formulas to find midpoint, gradient and distance on the Cartesian plane, and applies standard
Non-Linear Relationships	MA5.1-7NA	graphs simple non-linear relationships
Non-Linear Relationships	MA5.2-10NA	connects algebraic and graphical representations of simple non-linear relationships
Functions and Other Graphs	MA5.3-12NA	uses function notation to describe and sketch functions
Area and Surface Area	MA5.1-8MG	calculates the areas of composite shapes, and the surface areas of rectangular and triangular prisms
Area and Surface Area	MA5.2-11MG	calculates the surface areas of right prisms, cylinders and related composite solids
Area and Surface Area	MA5.3-13MG	applies formulas to find the surface areas of right pyramids, right cones, spheres and related composite solids
Volume	MA5.2-12MG	applies formulas to calculate the volumes of composite solids composed of right prisms and cylinders
Volume	MA5.3-14MG	applies formulas to find the volumes of right pyramids, right cones, spheres and related composite solids
Numbers of Any Magnitude	MA5.1-9MG	interprets very small and very large units of measurement, uses scientific notation, and rounds to significant figures
Right-Angled Triangles (Trigonometry)	MA5.1-10MG	applies trigonometry, given diagrams, to solve problems, including problems involving angles of elevation and depression
Right-Angled Triangles (Trigonometry)	MA5.2-13MG	applies trigonometry to solve problems, including problems involving bearings
Right-Angled Triangles (Trigonometry)	MA5.3-15MG	applies Pythagoras' theorem, trigonometric relationships, the sine rule, the cosine rule and the area rule to solve problems, including problems involving three dimensions
Properties of Geometrical Figures	MA5.1-11MG	describes and applies the properties of similar figures and scale drawings
Properties of Geometrical Figures	MA5.2-14MG	calculates the angle sum of any polygon and uses minimum conditions to prove triangles are congruent or similar
Properties of Geometrical Figures	MA5.3-16MG	proves triangles are similar, and uses formal geometric reasoning to establish properties of triangles and quadrilaterals
Circle Geometry	MA5.3-17MG	applies deductive reasoning to prove circle theorems and to solve related problems

Single Variable Data Analysis	MA5.1-12SP	uses statistical displays to compare sets of data, and evaluates statistical claims made in the media
Single Variable Data Analysis	MA5.2-15SP	uses quartiles and box plots to compare sets of data, and evaluates sources of data
Single Variable Data Analysis	MA5.3-18SP	uses standard deviation to analyse data
Bivariate Data Analysis	MA5.2-16SP	investigates relationships between two statistical variables, including their relationship over time
Bivariate Data Analysis	MA5.3-19SP	investigates the relationship between numerical variables using lines of best fit, and explores how data is used to inform decision-making processes

Year 9 Music Reporting Outcomes	
5.1	Performs selected music with appropriate stylistic features demonstrating solo and ensemble awareness
5.2	Understands musical concepts through analysis, comparison and discussion of music from different concepts
5.3	Understands musical concepts through aural identification, discrimination, memorisation and notation in music
5.4	Notates own compositions, applying forms of notation appropriate to the music selected for study.

Stage 5 Psychology Outcomes:

A student:

PSY5-1 explains how the field of psychology provides scientific explanations for the mind and behaviour through research, theories and approaches

PSY5-2 explains the main approaches to the study of the nature of human behaviour and the strengths and weaknesses of those approaches

PSY5-3 describes diversity and variation on the nature of personality, disease, disorders, intelligence and creativity and their influence on human behaviour

PSY5-4 explains a range of psychological theories and identifies the application of these theories to everyday life

PSY5-5 demonstrates an understanding of the importance of ethics in psychology, research and the interpretation of data

PSY5-6 recognises the applications and influence of psychology in popular culture and its importance to social factors

PSY5-7 examines suitable research methods including procedures and critical analysis when completing action based learning

PSY5-8 communicates psychological information and ideas using appropriate written, oral and visual forms.

Stage 5 Science Outcomes:

A student:

- SC5-4WS develops questions or hypotheses to be investigated scientifically
- SC5-5WS produces a plan to investigate identified questions, hypotheses or problems, individually and collaboratively
- SC5-6WS undertakes first-hand investigations to collect valid and reliable data and information, individually and collaboratively
- SC5-7WS processes, analyses and evaluates data from first-hand investigations and secondary sources to develop evidence-based arguments and conclusions
- SC5-8WS applies scientific understanding and critical thinking skills to suggest possible solutions to identified problems
- SC5-9WS presents science ideas and evidence for a particular purpose and to a specific audience, using appropriate scientific language, conventions and representations
- SC5-10PW applies models, theories and laws to explain situations involving energy, force and motion
- SC5-11PW explains how scientific understanding about energy conservation, transfers and transformations is applied in systems
- SC5-14LW analyses interactions between components and processes within biological systems
- SC5-15LW explains how biological understanding has advanced through scientific discoveries, technological developments and the needs of society
- SC5-12ES describes changing ideas about the structure of the Earth and the universe to illustrate how models, theories and laws are refined over time by the scientific community
- SC5-13ES explains how scientific knowledge about global patterns of geological activity and interactions involving global systems can be used to inform decisions related to contemporary issues
- SC5-16CW explains how models, theories and laws about matter have been refined as new scientific evidence becomes available

Year 9 Visual Arts Reporting Outcomes

1. Demonstrates developing technical accomplishment, refinement and autonomy when applying different art making conventions and procedures to make artworks (5.1, 5.6)
2. Makes artworks informed by their understanding of the frames, the conceptual framework and the world as a source of ideas, to extend concepts and meaning in artworks. (5.2, 5.3, 5.4, 5.5)
3. Applies their understanding of practice and the conceptual framework in critical and historical interpretations of art and demonstrates how the frames provide different interpretations of art (5.7, 5.8, 5.9)
4. Demonstrates that art criticism and art history construct meanings for the making of artwork. (5.10)
